

Evonik is the first chemical company to join the Industrial Internet Consortium® (IIC)

October 6, 2016

Evonik Industries has joined the Industrial Internet Consortium® (IIC), the very first chemical company to do so. The Industrial Internet Consortium is the global, public-private organization formed to accelerate adoption and enablement of the Industrial Internet of Things (IIoT). As a member, Evonik receives access to a partner network within which completely new technologies for the Industrial Internet are developed. Henrik Hahn, responsible for digitalization strategy at Evonik, explains: "We want to exploit digitalization to develop new, innovative solutions for our customers. Our membership of the IIC will provide valuable stimuli in this direction."

"With Evonik we have one of the world leaders in specialty chemicals among our members. Evonik has extensive knowledge and networks in different customer industries, and also in the scientific world. This makes it very attractive for our members and the IIC," said Dr. Richard Soley, executive director of the IIC.

At Evonik a digital unit headed by Henrik Hahn is analyzing the future potential of the theme for the chemical company. The physical and virtual worlds are becoming ever more closely interlinked. Digital technologies are altering value creation and innovation processes. The aim of the unit is to develop new products with digital service components all the way to new business models.
